AMENDMENTS TO THE CLAIMS:

- 1. (Currently amended) A saccharide-derivatized oligosaccharide mixture comprising the extrusion reaction product of a saccharide product having an average degree of polymerization ranging from 1 to 4 with a mixture of malto-oligosaccharides, wherein upon extrusion sufficient heat and work are imparted to said mixture of malto-oligosaccharides and said saccharide to derivatize said malto-oligosaccharides with said saccharide.
- 2. (Currently amended) A mixture according to claim 2 1, at least about 75% of the maltooligosaccharides in said mixture having a degree of polymerization greater than 5.
- 3. (Original) A mixture according to claim 1, said saccharide product consisting essentially of dextrose.
- 4. (Original) A mixture according to claim 3, said dextrose being in monohydrate form.
- 5. (Original) A mixture according to claim 1, said sacchride product consisting essentially of a mixture of dextrose and hydrogenated starch hydrolyzate, said product including about 50% to about 95% by weight of said hydrogenated starch hydrolyzate.
- 6. (Original) A mixture according to claim 5, said starch hydrolyzate being sorbitol.
- 7. (Original) A mixture according to claim 1, said saccharide product consisting essentially of maltose.
- 8. (Original) A mixture according to claim 1, said saccharide product consisting essentially of maltotriose.
- 9. (Original) A mixture according to claim 1, said saccharide product consisting essentially of maltotetraose.
- 10. (Original) A mixture according to claim 1, said saccharide product comprising a mixture of dextrose and at least one other saccharide.
- 11-33. (Canceled).
- 34. (New) A mixture according to claim 1, said malto-oligosaccharide comprising a maltodextrin and said saccharide-derivatized oligosaccharide mixture comprising a saccharide-derivatized maltodextrin.
